

Last Revised: Fall 2020

COURSE INFORMATION

Course Title: Business Calculus I

Course Number: MATH 111

Credits: 3

Total Weeks: 14 (Fall, Spring)
12 (Summer)

Total Hours: 39

Course Level: First Year Second Year
 New Revised Course
 Replacement Course

Department: Math / Statistics

Department Head: G. Belchev

Former Course Code(s) and Number(s) (if applicable): N/A

Pre-requisites (If there are no prerequisites, type NONE): PREC 12 (minimum grade of B) or MATH 100 or MATH 110 or MATH 120

Co-requisite Statement (List if applicable or type NONE): NONE

Precluded Courses: N/A

COURSE DESCRIPTION

This is a first course in calculus intended primarily for students in business and the social sciences. Topics include limits, growth rates, differentiation and integration, logarithmic and exponential functions and their application to economics and optimization.

LEARNING OUTCOMES

Upon successful completion of the course, students will be able to:

- Understand the concept of limit and being able to compute basic limits
- Differentiate algebraic and transcendental functions
- Sketch curves using derivatives, symmetry, and asymptotes
- Apply the derivative to solve word problems involving approximations, related rates, optimization, etc.
- Find elementary anti-derivatives

INSTRUCTION AND GRADING

Instructional (Contact) Hours:

Type	Duration
Lecture	39
Seminars/Tutorials	
Laboratory	
Field Experience	
Other (<i>specify</i>):	
Total	39

Grading System: Letter Grades Percentage Pass/Fail Satisfactory/Unsatisfactory Other

Specify passing grade: 50%

Evaluation Activities and Weighting (total must equal 100%)

Assignments: % <i>Specify number of, variety, and nature of assignments:</i>	Lab Work: %	Participation: % <i>Specify nature of participation:</i>	Project: % <i>Specify nature of project:</i>
Quizzes/Test: 25, 25 %	Midterm Exam: 25%	Final Exam: 25%	Other: % <i>Specify:</i>

TEXT(S) AND RESOURCE MATERIALS

Provide a full reference for each text and/or resource material and include whether required/not required.

Lial, ML, et al. Calculus with Applications, Current edition, Pearson

COURSE TOPICS

List topics and sequence covered.

- **Functions Review**
Linear, quadratic, polynomial, rational, exponential, logarithmic and trigonometric functions with some applications.
- **Differential Calculus**
Limits, continuity, derivatives, rates of change, rules for calculating derivatives, derivatives of exponential, logarithmic and trigonometric functions, implicit differentiation, higher-order derivatives.
- **Applications of Differential Calculus**
Curve sketching, optimization (including business applications), elasticity of demand, linear approximations, Newton's Method
- **Additional Topics**
Anti-derivatives, exponential growth and decay, L'Hospital's Rule

NOTES

1. Students are required to follow all College policies. Policies are available on the website at: [Coquitlam College Policies](#)
2. To find out how this course transfers, visit the BC Transfer Guide at: bctransferguide.ca
