COURSE DESCRIPTION

In this course students will be introduced to the geography of human settlements with a specific focus on urban areas. Attention will be devoted to their origin and development; their impacts on the landscape; their role in human culture and current driving forces, problems, and prospects. Throughout much of the course, Vancouver resources and examples will be used to illustrate many of the themes.

LEARNING OUTCOMES

Upon successful completion of the course, students will be able to:

- account for the dynamic history of urbanization, from the rise of civilization to the emergence of world cities
- describe the methods urban geographers use and distinguish among the competing interpretations of urban investigation they are premised upon
- identify and discuss a broad variety of core issues emphasized within the urban geography tradition
- provide insight into spatial processes of urban change such as urban planning, urban decay, intra-urban migration, and so on
- discuss urban life through a variety of lenses, including the economic, the social, and the environmental compare and contrast urban issues between more- and less-developed countries
