This course takes a geographical perspective to explore the social and environmental issues that shape our world today. Consideration of the historical roots of globalization will help students to learn about a variety of topics such as population, migration, cultural change, economic development, and human impacts on nature. Field trips will also be included as part of the course content.

LEARNING OUTCOMES

Upon successful completion of the course, students will be able to:

- account for the emergence and development of geographic knowledge through history
- demonstrate spatial literacy by being able not just to identify locations on the map but also to
- characterize relationships between them
- articulate the role of the age of exploration in establishing the foundations for globalization
- identify links between spatial features and related economic, social, and political phenomena
- form reasoned opinions in contemporary debates regarding political and environmental conflicts
