COURSE DESCRIPTION

In this course students will examine some major sociological issues in the analysis of Canadian society. Differing theoretical perspectives will be applied to the following topics: the development of the economic structure, the class structure and its relationship to regional development, ethnicity as a sociological phenomenon, the creation of a gendered social world, population characteristics, processes and theories, and sociological theories of religion.

LEARNING OUTCOMES

Upon successful completion of the course, students will be able to:

- explain the sociological perspective
- · explain the major theoretical perspectives within sociology
- analyze a number of the institutions of Canadian society [familial, religious, scientific, educational, legal, economic, political...] using the major theoretical perspectives within sociology
- explain the significance of social movements
- outline the sociology of work
- outline the elements of environmental sociology
- explore the sociology of health and illness
- explain the implications of globalization.
