COURSE	DESCRIPTION						
This course introduces students to a spatial perspective on the provision of goods and services in societies. By establishing a historical sense of the rise of capitalism in the modern era and the attendant new notions of 'economy' which accompanied this transformation, the causes and consequences of economic interaction will be considered across the local, national, and global levels. Looking at the transnational corporation, commodity chains, labour migration and other such topics will help students to interpret theoretical ideas in the context of real-world case studies.							
LEARNING OUTCOMES							
<ul> <li>Upon successful completion of the course, students will be able to:</li> <li>Clearly define core economic geographic concepts such as relative location and uneven development.</li> </ul>							
<ul> <li>Identify various ways in which economic geographies have changed through history, both locally and globally.</li> </ul>							
<ul> <li>Describe the rise of the global economy and to concretely identify its pros and cons using case examples.</li> </ul>							
<ul> <li>Demonstrate an awareness of how questions around 'economy' may also be social, cultural, and political in nature.</li> </ul>							
<ul> <li>Present content comparing the causes and consequences of different standards of living worldwide.</li> </ul>
